Cassettes

Cassette 530

Minimal, light and reliable, this cassette is the refined alternative to conventional awning systems. Designed to complement residential balconies, it enhances both functionality and the visual appeal of every building's facade.

Cassette 732

The 732 model features a softer, rounded design that is visually pleasing and refined. Built with reinforced aluminum profiles, it offers greater strength and can extend to wider dimensions than the 530 model, making it ideal for larger spaces without compromising style. It also introduces a lighting upgrade with Maxi LED awning arms, featuring a slot to accommodate LED tape along the full length of the arm, hence providing seamless, ambient illumination that elevates the atmosphere.

Epica

## The Art of Lasting Design.

Elegant, robust, and built to last, the Epica model blends sleek, straight-cut Italian design with exceptional durability. Its tall case allows the awning to fully retract into a compact box with a closed length of just 6.7 inches, maintaining a clean look. Outfitted with reinforced arms featuring a stainless-steel chain mechanism, Epica is engineered to withstand even the most challenging weather conditions. An optional integrated LED tape enhances the ambiance, offering the perfect transition between shade and light.
